

DORIN GABER

Senior Product Designer | AI Products | B2B SaaS | Complex Systems

doringaber@gmail.com • +972-54-455-2236 • LinkedIn • Portfolio

Senior Product Designer with extensive experience designing AI-powered products, B2B SaaS platforms, and complex enterprise systems. I lead end-to-end product design - from discovery, user flows, and prototyping to polished UI, developer handoff, and implementation review. I work closely with product and engineering teams to simplify technical workflows and turn complex capabilities into clear, scalable product experiences.

EXPERIENCE

Senior Product Designer | Tabnine | 2023 - Present

- Lead end-to-end product design for AI-powered developer tools and enterprise SaaS experiences across IDE and web products.
- Translate complex AI capabilities and technical requirements into clear user flows, intuitive interactions, and scalable product experiences.
- Partner closely with product managers and engineers from discovery and concept development through implementation and design review.
- Design complex workflows for AI model configuration, administration, code optimization, testing, and developer productivity.
- Create user flows, wireframes, high-fidelity UI, interactive prototypes, and detailed developer handoff documentation.
- Contribute to the product design system and use AI-assisted prototyping workflows to validate concepts and accelerate collaboration with engineering.

Senior Product Designer | Netafim | 2021 - 2022

- Led end-to-end product design for complex digital agriculture products serving growers, partners, and internal teams.
- Translated domain-specific requirements and data-heavy workflows into clear, accessible product experiences.
- Worked with product, engineering, and domain experts across multiple platforms, from research and user flows to prototypes, UI, and usability testing.

Senior Product Designer | JOKR | 2021

- Designed a complex internal operations platform for a fast-paced delivery startup, supporting multiple teams and operational workflows.
- Simplified multi-step processes through workflow mapping, wireframes, prototypes, and high-fidelity UI.
- Collaborated closely with product and engineering to deliver practical solutions under rapidly changing business requirements.

Freelance UX/UI & Digital Designer | Independent | 2013 - 2021

- Led UX/UI, web, branding, and digital design projects for startups, businesses, and organizations.
- Managed projects from client discovery and requirements definition through design, delivery, and implementation support.
- Designed responsive websites, digital products, user flows, wireframes, prototypes, and visual identities.

CORE EXPERTISE

End-to-end product design
AI products & developer tools
Complex B2B SaaS workflows
Product discovery
Interaction & UX design
User research & usability testing
Prototyping & validation
Design systems
Developer handoff & design review
Cross-functional collaboration

TOOLS

Design & prototyping

Figma, FigJam, Figma Make, Axure

AI & development

Claude Code, GitHub, AI-assisted prototyping, HTML/CSS

Additional

Adobe Creative Suite, WordPress

EDUCATION

UX/UI Design Program

Netcraft Academy | 2020 - 2022

Web Development & Digital Interface Design

Mentor | 2016 - 2017

New Media, Graphic Design & Visual Communication

Kavim | 2012 - 2013

B.Sc. in Life Sciences

The Hebrew University of Jerusalem | 2006 - 2009

LANGUAGES

Hebrew - Native
English - Fluent
